## Explanatory Notes – Notices to Mariners (NOTMAR)

**Geographical positions** refer directly to the graduations of the largest scale Canadian Hydrographic Service chart (unless otherwise indicated).

**Bearings** refer to the true compass and are measured clockwise from 000° (North) clockwise to 359°; those relating to lights are from seaward.

**Visibility** of lights is that in clear weather.

**Depths** - The units used for soundings (metres, fathoms or feet) are stated in the title of each chart.

**Elevations** are normally given above Higher High Water, Large Tide (unless otherwise indicated).

**Distances** may be calculated as follows:

- 1 nautical mile = 1,852 metres (6,076.1 feet)
- 1 statute mile = 1,609.3 metres (5,280 feet)
- 1 metre = 3.28 feet

### Temporary and Preliminary Notices to Mariners – Section 1A of *Notices to Mariners*

These notices are indicated by a (T) or a (P), respectively. Please note that nautical charts are not amended by the Canadian Hydrographic Service for temporary (T) and preliminary (P) notices. It is recommended that mariners chart these corrections in pencil. For the list of charts affected by (T) & (P) notices, please refer to the current [Notices to Mariners - Monthly Summary of Temporary and Preliminary Notices](#) publication.

### Suggestions and Corrections Form

This form is specifically for suggestions and corrections to Notices to Mariners publications. It is available [online](#) and also in [fillable PDF format](#) included with the monthly publication ZIP file.

To submit comments and suggestions on possible improvements to the various publications and services: [DFO.Notmar-Notmar.MPO@dfo-mpo.gc.ca](mailto:DFO.Notmar-Notmar.MPO@dfo-mpo.gc.ca).

To report chart discrepancies and/or corrections to the *Canadian Sailing Directions* booklets: Fill out the [Marine Information Reporting Form](#) and/or email [chsinfo@dfo-mpo.gc.ca](mailto:chsinfo@dfo-mpo.gc.ca).

To report emergencies or navigational hazards: [Contact your nearest MCTS centre](#)

- VHF channel 16 (156.8 MHz)
- MF/HF frequency 2182 kHz/4125 kHz (where available)
- \*16 on a cellphone (where available)

### NOTMAR Website – Monthly Editions, Chart Corrections and Chart Patches

The NOTMAR website allows users to access the [monthly publications](#), [chart corrections](#), and [chart patches](#).

Users can subscribe for free to the [email notification service](#) to receive notifications when charts of interest are updated, including their patches, as well as when a new Monthly Edition of *Notices to Mariners* is published.

In addition, the monthly publication and related files to download, such as chart patches, can be obtained all together through the download of a single ZIP file.

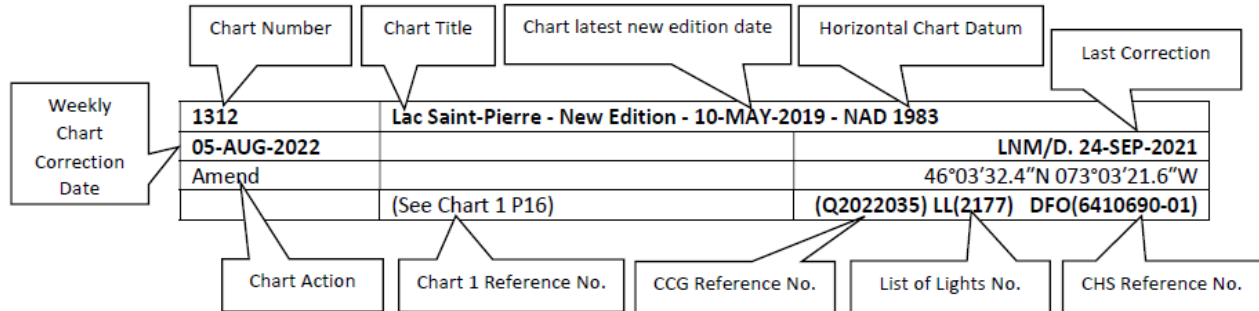

## Explanatory Notes – Canadian Hydrographic Service (CHS)

### Chart Corrections – Section 2 of *Notices to Mariners*

Corrections to nautical charts will be listed in numerical order by chart number. Each chart correction listed applies only to that particular chart. Related charts, if any, will have their own specific correction listed separately.

Users should also refer to CHS *Chart 1: Symbols, Abbreviations and Terms* for additional information pertaining to the correction of charts.

The illustration below describes the elements that will comprise a typical Section 2 chart correction:

The last correction number is identified with the **LN/D** or **Last Notice to Mariners Number / Date**.

Mariners are advised that only the most critical changes that directly affect safety to navigation are issued in “Section 2 – Chart Corrections.” This limitation is required to ensure that charts remain as clear and easy to read as possible. As a result, mariners may see minor discrepancies of a non-critical nature between information in official publications. For example, a small change in the nominal range or focal height of a light may not result in the production of a chart correction in *Notices to Mariners*, but may result in a correction in the [List of Lights, Buoys and Fog Signals](#) publication.

Note: In the case of a discrepancy between information provided on CHS charts relating to aids to navigation, and the *List of Lights, Buoys and Fog Signals* publication, the latter shall be deemed as containing the most up-to-date information.

### Canadian Nautical Charts & Publications

A source list of Canadian nautical charts and publications is published in Notice No. 14 of the *Notices to Mariners Annual Edition 2024*. The source supply and the prices effective at the time of printing are listed. For current chart edition dates, please refer to the [Canadian Hydrographic Service – List of Charts](#).

## Explanatory Notes – Marine Communications and Traffic Services (MCTS)

### Navigational Warnings / Notices to Shipping

The Canadian Coast Guard (CCG) is implementing a number of changes to the aids to navigation system in Canada.

These changes are advertised as Navigational Warnings, formerly called Notices to Shipping<sup>1</sup>, that are broadcast by the CCG, and are then followed up with Notices to Mariners, then charts are updated by hand correction, reprints or new editions.

Mariners are advised that all relevant Navigational Warnings (NAVWARN) should be kept until superseded by Notices to Mariners or through revised charts issued by the Canadian Hydrographic Service (CHS).

NAVWARN are accessible on the applicable regional page on the [CCG Navigational Warnings](#).

CHS is reviewing the impact of these changes with CCG and together are preparing an action plan on the issuing of chart revisions.

For further information, contact your regional NAVWARN Issuing Desk.

## Numerical Index of Canadian Charts Affected

This numerical index lists all nautical charts mentioned in this monthly edition of Notices to Mariners. Only charts appearing in Section 2 of this publication require a chart correction. The appearance of charts in all other sections, particularly those related to the correction of other nautical publications, is included here for reference.

## Section 1: General and Safety Information

---

### **\*505/23 Canadian Hydrographic Service – Magnetic Declination Calculations**

(Recurrent publication of notice \*505/23, originally published in the *Notices to Mariners – Monthly Western Edition 05/2023* publication.)

Mariners are advised that CHS has adopted the harmonized World Magnetic Model (WMM), as found on the NCEI/NOAA website. Old compass rose declination information on CHS navigational products can be updated using the [Magnetic Declination Estimated Value](#) website. While the differences in the model declinations are small each year, they can become more significant over a large period of time.

### **\*1004/23 Transport Canada – British Columbia North Coast Waterway Management Guidelines**

(Recurrent publication of notice \*1004/23, originally published in the *Notices to Mariners – Monthly Western Edition 10/2023* publication.)

Reference: Notice \*905/22 is cancelled.

The North Coast Waterway Management Guidelines are voluntary guidelines that aim to improve safety on the water by reducing conflicts between First Nations' marine use activities, such as fishing and shoreline harvesting, and commercial vessels on the shipping route between Kitimat and Browning Entrance. The guidelines came into effect on September 1, 2022, and will be reviewed from time to time.

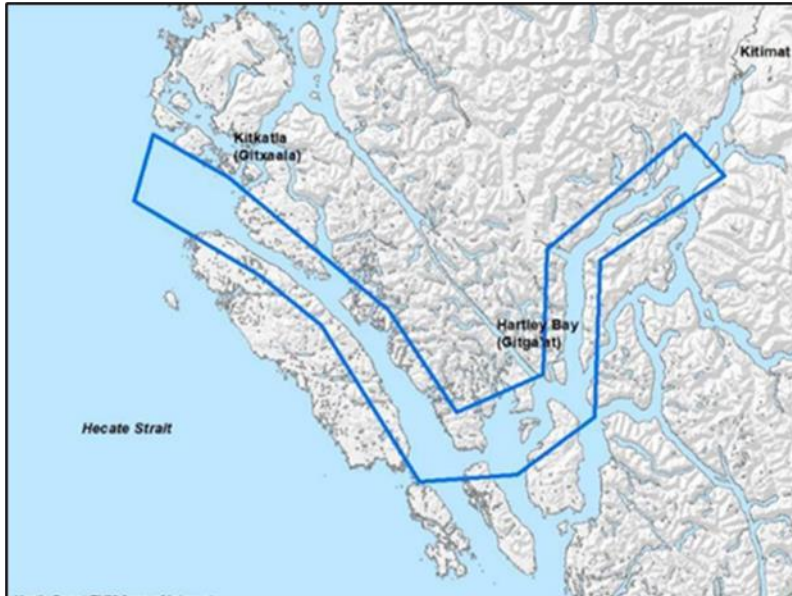

The guidelines apply to all vessels navigating on the route between Kitimat and Browning Entrance, on the north coast of British Columbia. This area includes:

- Douglas Channel
- Wright Sound
- Lewis Passage
- Otter Channel
- Nepean Sound, and
- Principe Channel

The complete guidelines document is available at [British Columbia North Coast Waterway Management Guidelines](#).

Nothing in these guidelines replaces or changes how we apply any Canadian or international laws or regulations, including the Collision Regulations. Furthermore, nothing in these guidelines prevents or limits the master or pilot of a ship from making any decisions to protect the vessel, the crew, or the marine environment.

The guidelines include information for:

- all vessels that covers:
  - inshore safety zones
  - routing measures
  - speed reductions
  - guidelines for meeting and passing
    - a special operating area in Wright Sound, and
    - guidelines in case of a mechanical or electrical breakdown
- large commercial ships, including bulk carriers, general cargo vessels, liquid bulk vessels, and passenger vessels
- tugs and barges, and
- vessels operating in First Nations Areas of Concern where you must pay special attention to make sure local community users can transit and use the area safely.

### **\*1207/23 Canadian Hydrographic Service – Inappropriate Geographical Names Review Process**

(Recurrent publication of notice \*1207/23, originally published in the *Notices to Mariners – Monthly Western Edition 12/2023* publication.)

The records of the Canadian Hydrographic Service could contain geographical names that may be considered inappropriate, offensive and derogatory. Geographical naming authorities are in the process of addressing many offensive place names, the review process is underway. For more information, about inappropriate geographical names, please see the [following announcement](#).

**\*208/24 West Coast Haida Gwaii – Voluntary Protection Zone for Shipping**

(Recurrent publication of notice \*208/24, originally published in the *Notices to Mariners – Monthly Western Edition 02/2024* publication.)

Reference: Notice \*1105/21 is cancelled.

**Voluntary Protection Zone for Shipping, western shore of Haida Gwaii  
(formerly Queen Charlotte Islands)**

Haida Gwaii's remote location, rugged coastline, variable sea and weather conditions, and rich ecological and cultural heritage make it vulnerable to the potential for pollution from shipping breakdowns and accidents. Increasing the distance vessels travel offshore can increase the amount of time available to address propulsion, steering or other issues, and the likelihood of a towing vessel being able to respond to a vessel in distress or drifting. This in turn reduces the risk of grounding and oil spills.

A Voluntary Protection Zone for Shipping on the western shore of Haida Gwaii is currently in effect. In the Voluntary Protection Zone, commercial vessels of 500 gross tonnage or greater are requested to observe a minimum distance of 50 nautical miles from the western shore of Haida Gwaii with the following exemptions:

**Exemptions from requested 50 nm distance:**

- Cruise vessels, which are asked to observe a minimum 12 nm distance from shore;
- Vessels transiting from Alaska to British Columbia or Washington State, or vice versa, through the Voluntary Protection Zone are asked to observe a distance of at least 25 nm from shore
- No minimum distance is requested for tugs and barges (including pushing and towing alongside) or vessels engaged in commercial fishing.
- Vessels to which this bulletin applies are not required to observe requested minimum distances if doing so may compromise navigational, vessel, passenger or cargo safety.

The Voluntary Protection Zone for Shipping coordinates are:

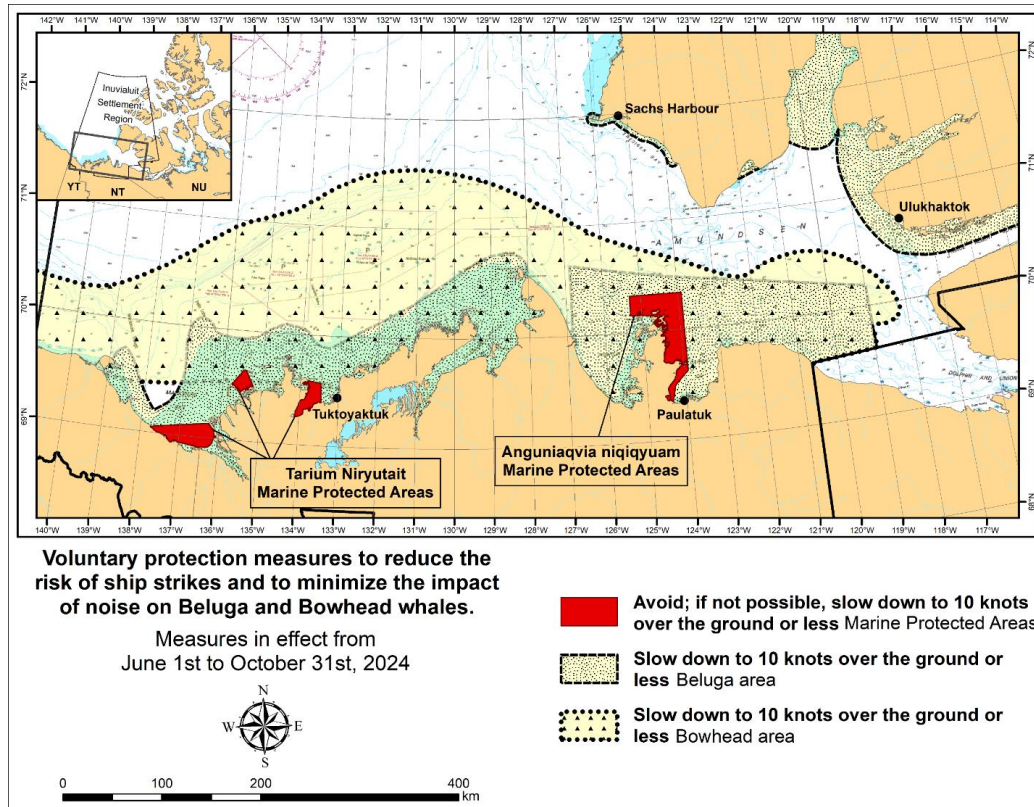

54° 15.436' N	133° 04.788' W
54° 17.572' N	134° 02.484' W
54° 13.614' N	134° 19.427' W
54° 11.786' N	134° 30.841' W
53° 44.036' N	134° 32.677' W
53° 11.118' N	134° 16.412' W
52° 18.483' N	133° 20.917' W
51° 24.590' N	132° 04.081' W
51° 56.158' N	131° 01.830' W

Vessels are requested to adhere to these distances on a voluntary basis and only when it does not jeopardize the safety of navigation, the vessel, the persons onboard, and the cargo.

**\*505/24 Voluntary Avoidance of Anguniaqvia Niqiqyuam Marine Protected AreaS (ANMPA) and Tarium Nirjutait Marine Protected Areas (TNMPA) and Voluntary Slowdown in Beluga and Bowhead Whale Areas**

(Recurrent publication of notice \*505/24, originally published in the *Notices to Mariners – Monthly Western Edition 05/2024* publication.)

The two established Marine Protected Areas (MPAs) in Canada’s Western Arctic are located within the Inuvialuit Settlement Region, as such all activities must comply with the [Inuvialuit Final Agreement](#). Protection and preservation of Arctic wildlife, the environment and biological productivity is one of the principles of the Inuvialuit Final Agreement and it is this principle that led the Inuvialuit Regional Corporation and the Inuvialuit Game Council to initiate establishment of the Western Arctic MPAs. The waters in and near the MPAs, and the offshore marine habitats of the Beaufort Sea and Amundsen Gulf, are important summer foraging habitats used seasonally (May-October) by the Eastern Beaufort Sea beluga stock, and the Bering-Chukchi-Beaufort bowhead population.

**REGULATORY PROTECTION MEASURES**

All whale species are protected under the Marine Mammal Regulations, pursuant to the *Fisheries Act*. Within the boundaries of the MPAs, a general prohibition is set out in the Regulations, pursuant to the *Oceans Act*. Any incident with a marine mammal within the MPAs must be reported within two hours after its occurrence, to the Canadian Coast Guard. For marine wildlife sightings and incidents such as collisions that occur outside the MPAs or for any situation involving a marine mammal that is dead or in trouble, contact Fisheries and Oceans Canada, Inuvik office at (867) 777-7500.

For more information on the ANMPA and TNMPA, including local contacts and species specific minimum distances, see Section A2 - Notices 5 and 5A of the *Notices to Mariners Annual Edition 2024*.

**VOLUNTARY PROTECTION MEASURES**

Voluntary measures are in effect from June 1<sup>st</sup> to October 31<sup>st</sup>, 2024. See map above.

These measures apply to merchant vessels, cruise ships, small vessels and adventure craft within the boundaries of the MPAs and the additional identified areas to prevent collisions with whales and to mitigate the underwater noise generated by the vessels. These measures should only be taken when they will not jeopardize navigational safety.

**Avoid (red area):** To reduce the risk of underwater noise disturbance and collisions with whales within the MPAs, vessels should avoid transiting through the MPAs if possible. If passage through this area is required, vessels should slow down to a maximum of 10 knots over the ground and post a lookout such as a marine mammal observer in order to increase the chances of seeing the whales and thus taking necessary measures to avoid them. If bypassing the whales is not possible, slow down and wait for the animals to move away to a distance greater than 400 metres (0.215 nautical miles) before resuming original speed up to 10 knots over the ground. It is more difficult to see the animals in rain, fog, or in rough sea states, therefore increased caution is recommended.

**Slow down to 10 knots over the ground or less (yellow area):** To reduce the risk of underwater noise disturbance and collisions with whales within this area, it is recommended that vessels should slow down to a maximum speed of 10 knots over the ground, remain in the navigation and marked community supply channels and post a lookout.

These voluntary measures are secondary to rights under the Inuvialuit Final Agreement.

**MPA Coordinates**

The Tarium Niryutait Marine Protected Areas consist of three areas of the Mackenzie Bay: Okeevik, Kittigaryuit and Niaqunnaq. The three areas are bounded by rhumb lines connecting the following geographical coordinates [North America Datum 1983 (NAD 83)/World Geodetic System (WGS 84)].

Okeevik Sub Area		
Point	Latitude (North)	Longitude (West)
1	69° 38' 19"	135° 25' 09"

**\*803/24 Canadian Hydrographic Service - Transboundary Agreement**

(Recurrent publication of notice \*803/24, originally published in the *Notices to Mariners – Monthly Western Edition 08/2024* publication.)

A new gridded ENC transboundary agreement covering Dixon Entrance and Pearse Canal/Portland Canal has been created and signed by NOAA and CHS. New NOAA and CHS ENCs will be released in late 2024. Full ENC coverage will be available from both agencies, but the product scales may differ. For more details, please contact [chinfo@dfo-mpo.gc.ca](mailto:chinfo@dfo-mpo.gc.ca).

**\*817(P)/24 Milbanke Sound and Approaches/et les approches - Paper Chart to be Discontinued**

(Recurrent publication of notice \*817/24, originally published in the *Notices to Mariners – Monthly Western Edition 08/2024* publication.)

Reference chart: 3728

The Canadian Hydrographic Service proposes to permanently discontinue paper chart 3728 called Milbanke Sound and Approaches/et les approches.

Mariners and other interested parties are invited to comment on this action until October 31, 2024.

Comments should be directed to the following email address: [chsinfo@dfo-mpo.gc.ca](mailto:chsinfo@dfo-mpo.gc.ca).

Any objections raised must state the facts on which they are based and should include supporting information on safety, commerce and public benefit.

**\*903/24 Canadian Coast Guard Publication – *The Canadian Aids to Navigation System 2023***

*The Canadian Aids to Navigation System 2023* is now available for free download, on the Canadian Coast Guard website.

- [Canadian Aids to Navigation System 2023 \(PDF\) / HTML](#)
- [Quick Reference Guide to Canada's Navigational Aids \(2022 horizontal view\) \(PDF\)](#)
- [Quick Reference Guide to Canada's Navigational Aids \(2022 vertical view\) \(PDF\)](#)
- [Video: The Canadian Aids to Navigation System](#)

The 2023 edition supersedes the 2011 edition.

**\*904/24 Canadian Hydrographic Service – Raster Navigational Charts Discontinued**

The Canadian Hydrographic Service (CHS) commenced the discontinuation of its digital Raster Navigational Charts (RNC) offered in BSB format in March 2022.

Charts to be cancelled effective immediately as part of this ongoing initiative are listed below.

CHS will support Global Navigation Satellite System (GNSS) users by offering Electronic Navigational Charts (ENC) in S-57 format, as well as non-GNSS users by continuing to offer Paper Charts. To learn more about the advantages of ENC over RNC, please visit the [What is the difference between a raster chart and a vector chart](#) page.

## Section 1A: Temporary and Preliminary Notices

### Reminder – Comment Period for Active Preliminary Notices

This is a reminder that the comment period is still open for the following active Preliminary notices:

Notice #	Reference Chart #	Aids Affected (LL #)	Intent of Notice
<b>Pacific Coast</b>			
<a href="#">817(P)/24</a>	3728	N/A	Paper Chart to be Discontinued

Please refer to the [Notices to Mariners - Monthly Summary of Temporary and Preliminary Notices](#) publication for details.

### Inland Waters

#### Temporary Notices

No notices applicable for this edition.

#### Preliminary Notices

No notices applicable for this edition.

### Pacific Coast

#### Temporary Notices

No notices applicable for this edition.

#### Preliminary Notices

### Western Region

#### Comment Submission

Comments on proposed changes in preliminary (P) notices are solicited from mariners and other interested parties within three months of the initial publication date. Following this date, the notices will be cancelled. Any objections raised must state the facts on which they are based and should include supporting information on safety, commerce and public benefit.

Comments should be directed to the following:

Superintendent, Marc Jourdenais  
Aids to Navigation & Waterways  
Canadian Coast Guard, Western Region  
25 Huron Street  
Victoria, BC V8V 4V9  
Telephone: (250) 480-2602  
Fax: (250) 480-2702  
Email: [marc.jourdenais@dfo-mpo.gc.ca](mailto:marc.jourdenais@dfo-mpo.gc.ca)

**\*911(P)/24 Baynes Sound – Aids to Navigation to be Discontinued**

Reference chart: 3527

The Canadian Coast Guard proposes to permanently discontinue the following aids to navigation:

Aid Name	LL #	Position
Courtenay River front range #1	5305.4	49° 40' 31.5"N 124° 57' 19.8"W
Courtenay River rear range #1	5305.5	49° 40' 30.4"N 124° 57' 15.9"W
Courtenay River starboard daybeacon #2	5306.3	49° 40' 51.7"N 124° 58' 36.4"W
Courtenay River front range #3	5306.4	49° 40' 52.3"N 124° 58' 33.6"W
Courtenay River rear range #3	5306.5	49° 40' 53.9"N 124° 58' 39.2"W
Courtenay River front range #4	5306.6	49° 40' 49.0"N 124° 58' 37.3"W
Courtenay River rear range #4	5306.7	49° 40' 48.1"N 124° 58' 34.7"W

Initial publication date: Friday, September 27, 2024

[Comment submission deadline](#): Thursday, December 26, 2024

(P2024-071 to 074)

## Section 4: Canadian Sailing Directions Corrections

---

The following **Canadian Sailing Directions** volumes have recently been updated on the [Canadian Hydrographic Service website](#).

No.	Title
<b>Atlantic Coast</b>	
<b>ATL 105</b>	Cape Canso to Cape Sable (including Sable Island)
<b>ATL 108</b>	Gulf of St. Lawrence (Southwest Portion)

Each volume includes a section entitled “Record of Changes” which lists all updates that are incorporated during the current calendar year.

## Section 5: List of Lights, Buoys and Fog Signals Corrections

The amendments are highlighted and deletions are crossed out. For general and region-specific information on the List of Lights, click on the following links: [Newfoundland and Labrador Coast](#), [Atlantic Coast](#), [Inland Waters](#) and [Pacific Coast](#).

No.	Name	Position ----- Latitude N. Longitude W.	Light Characteristics	Focal Height in m. above water	Nomi- nal Range	Description ----- Height in meters above ground	Remarks ----- Fog Signals
-----	------	--------------------------------------------------	--------------------------	--------------------------------------------	-----------------------	----------------------------------------------------------	---------------------------------
